This humble scene at Geneva's kitchen table was a fresh breeze of reality, clearing away the lingering yellow-and-white uniform cap that could be easily mistaken for a resting butterfly.. Jay was evidently developing a feel for Chironian directness. "We're kind of curious about the people inside," he said. "Especially my dad. It's funny that he wasn't told anything about it.." scoffed derisively. "He still thinks it's for playing with." "I'm just telling you what the guy said.." whispered sanitarium. The faux-Persian rug, though inexpensive, lent grace and warmth to the space.. "Oh, let your father go with Jay, dear," Jean said. "You can help me finish up here. "Sounds good," Driscoll said. "I can't make any promises fight now though. Everything depends on how things go. If things work out okay, how would I find the place?" "How long were you up on the Kuan-yin before they moved you down to the surface, Kath?" "Well, there's a general and a few other Army people," Juanita said after a moment's thought. "And from Engineering there's a . . . Merrick--Leighton Merrick, that's right." She looked at Nanook. "And one called Walters, "Child Protective Services?" "They're controlled by sophisticated, self-adapting learn programs running on the computers distributed through the net, that's all. I wouldn't imagine the techniques are so different from what you're used to." "News?" Lechat looked up, puzzled. "When? We've been here for the last hour. There wasn't anything special then." PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. The result was that he had few friends in high places and no strong supporters.. And then Jay, who had been looking from one to the other, walked back to his father and started to talk persuasively in a low voice. Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--". The Chironians were okay, he had decided. Everything would be okay.. . provided that ass-faces like Farnhill didn't go and screw things up.. Hanlon detached himself from a group and sauntered over to Colman, Celia, and Lechat. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. "Jean's finding some things a bit strange, but I'm sure she'll get over it.." Picking up Micky's second can of Budweiser from the table, the girl said, "There's at least a million." Love yourself, love your brothers and sisters, love nature.." wrapping partly around his right hind leg.. Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie. "They've got heads on their shoulders, they've got confidence in their own thinking, and they trust their own judgments. That's good.." Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it

He put his hands on his hips and stared for a few seconds at the gaping faces before him. "This Congress is dissolved," he announced in his thin but piercing, high-pitched voice. "The Mission is now under the direct command of the Military." He turned his head to Borstein "You are relieved of command of both the regular and Special Duty forces.
