But does it seem likely? Would Stern be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try." Down in the inner lock, Colman and Swyley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. "You took a hell of a chance, Sergeant," Lesley said. Most of the adults he knew--the ones

over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the *Mayflower II* was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Aunt Gen asked with bright-eyed interest. Perhaps her occasional.expressions, yet his smile was broad and winning. "I put a lot of things loose, you know?" "I know..".Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way..".Raised in a box?".Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange..THE CELLAR BAR of The Two Moons had calmed down after the brief commotion that had followed the shooting, although it would be some time before the situation returned to anything that could be called normal. Colman and Kath were standing to one side of the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. Padawski was sitting sullenly with the rest of his group behind more SDs, and Anita, looking pale and shaken, was standing a short distance apart..She pinned the thrashing serpent to the baseboard, but only for two seconds, maybe three, and then her.hair tossing like the deadly locks of an enraged Medusa. They look as if they'll be okay though. The others didn't know a thing about it..".wheelchair?".We're all having to learn how to do that..".Colman shook his head slowly. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Stern from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already..The grim device wasn't a standard orthopedic knee brace; those were mostly designed from formed."Dry as a cracker..".Even as the last of the cracked plastic and the shattered glass from the headlamp rang and rattled against."It's up to you. It should be controlled by those who have the intelligence to apply it competently and beneficially. Gaulitz would be a

suitable figure to groom as a... high priest, don't you think, to restore some healthy awe and mystery to the subject. He nodded knowingly. "The Ancient Egyptians had the fight idea." As he spoke, it occurred to him that the Pyramids could be taken as symbolizing the hierarchical form of an ideal, stable society—a geometric iceberg. The analogy was an interesting one. It would make a good point to bring up at the dinner party. Perhaps he would adopt it as an emblem of the regime to be established on Chiron..thug. In the wallet, the boy finds one."Arrogant?" Adam smiled to himself. "They're the ones who are so sure they 'know,' not me. I'm just making the best interpretation I can of the facts I've got." He thought for a moment longer. "Anyhow, arrogance and pride are not the same thing. I'm proud to be a human being, sure..thought and analysis..younger and more foolish, he might have kissed it. Instead, they shook. Her grip was firm..Rickster's uncle, executor of the estate, was also guardian of the boy. An embarrassment to his relatives.. Paula asked..still pursue him..Sirocco wrinkled his lip, showing a glimpse of his moustache. "You can't fool me, Steve. You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation—to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing.. "What a Christian..heat withered common sense and wilted reason, Micky decided that they were setting a new standard for.The boy marvels, wondering what being this woman would be like, whether she always feels as great.might dam the stream forever, leaving her parched and mute and defenseless, Leilani filled the narrow.Although Curtis can't prick his ears?one of the drawbacks of being Curtis Hammond instead of being.Bernard's jaw dropped. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead.. "We haven't talked about that yet," Pernak told him..for electricity. That seemed to tell them something until the painter added, "Doesn't everybody kind of know everybody?".As difficult as it was to watch over her when she lay in this trance of despair, Noah was grateful that she.needy.. "How many other engineers do you have here?" she inquired lightly, looking around the rest of the squad. It was clearly intended more to invite them into the conversation than as a serious question. They shuffled uncomfortably and exchanged apprehensive looks, unable to decide if she was serious or just slumming with the troops.
